CADWorx Discovery Tour 2008

IOCS Asia Pte Ltd and COADE Inc co-organised the CADWorx Discovery Tour at RSYC (Republic of Singapore Yacht Club) on 5th December 2007 as part of COADE's tour in South East Asia.

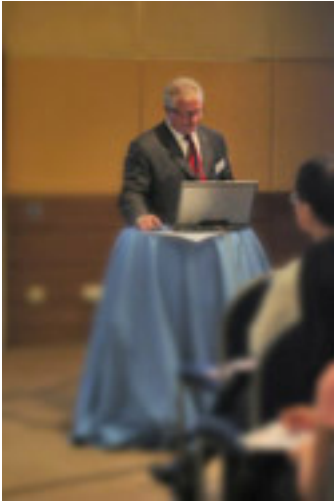

This seminar was an initiative by COADE Inc to introduce the new capabilities and future directions of CADWorx Plant Design Suite 2008, to their world wide clientele. It attracted 75 participants; largest crowd in Asia Pacific, from the CADWorx community and other non users in the region.

The event started off with a luncheon where participants got to network with other professionals in the industry and with the presenters from COADE Inc.

Dr David Haines, Chairman of IOCS Pte Ltd and Mr Bill Evans, VP & Co-founder of COADE Inc, both gave an introduction speech to kick off the event.

This was followed by an enriching and informative presentations from Mr John Brinlee, Sales Manager and Mr Joe Dixon, Product Manager both from Plant Design Solutions team.

The topics covered for CADWorx included recent key enhancements, P&ID, fieldPipe and the future of the product. The bi-directional links with COADE's pipe stress analysis solution, CAESAR II was also demonstrated to the attendees.

The crowds were very interactive and constructive questions were asked to help them to have a better understanding of CADWorx to fully utilise the features and capabilities.

Highlights of the day

Top CADWorx User Award was presented to HS Compression & Process Pte Ltd by Mr Bill Evans.

Ms Cheong Oi Sin, Engineering Coordinator, received the award on behalf of their organisation. They were chosen for their extensive and comprehensive application of CADWorx Plant Professional in their projects.

A contest was also created to encourage participants to share their views, personal experience and reasons for choosing CADWorx as their preferred plant design solutions.

Hence, after rounds of judging and careful considerations, the top 2 entries have been chosen.

1st Prize:

Chen Kate Sam

KEPPEL SEGHERS ENGINEERING SINGAPORE PTE LTD

“CADWorx Plant Design is simple to use; it is flexible and scalable software that allows users to convert from simple 2D drawings to a 3D model that most software are incapable of coping with. Besides, it provides useful and important pipe data and information with just a simple click that eliminates complicated steps and procedures. On the other hand it makes it so simple to have clash detection on the designed plant hence saving time and cost of completing it expediently. Most importantly, CADWorx is software that works perfectly and suitably well from a small-scale project to a multi-billion huge project. I certainly recommend CADWorx to all my colleagues, superiors and friends who are in the same industry as I am now working in.”

2nd Prize:

Deogracias Galang

EMERSON PROCESS MANAGEMENT ASIA PACIFIC PTE LTD

“I prefer CADWorx because of its competitive price compared to other CAD packages. It has simple and easy to use commands for data/specs preparation. There is no need for an administrator to manage specs. Creating 3D piping is no sweat, and it helps a lot in creating our project very fast! Creating isometrics and BOM is great! I will definitely recommend this to other companies. CADWorx has increased our productivity because of its automatic processes. SPECVIEW is the feature I like most.”

IOCS Asia Pte Ltd and COADE Inc would like to thank everyone sincerely for their participation and support in making this seminar a success and will continue to provide you with professional engineering solutions services.
